CONCEPTTAG

# How to secure clothing using the Concept Tag

### T-shirts

For t-shirts, fix a tag at the seam midway between the arm and waist.

### Blouses

Tag blouses directly below the join below the arm near the seam.

## The tag must be pushed onto the pin fully, ensuring there's no gap, and it's completely secure.

**Trousers and jeans**

Attach the tag between the rear pockets. If this is not possible, attach halfway down the leg near the seam.

**Skirts**

On a skirt we would recommend placing the tag on a seam at the side or rear of the garment half way between top and bottom.

# The tag must be pushed onto the pin fully, ensuring there's no gap, and it's completely secure.

**The World's Most Secure Tag**
